PROFESSIONAL EXPERIENCE

Handshake AI - AI Model Evaluator (Contract, Part-Time) *Mar 2026 - Present*
Remote

- Source, segment, and organize video assets into multimodal training datasets, and write definitive multistep prompts that direct the model to find specific events in video timelines.
- Inject realistic decoys and false leads to test whether the model separates noise from key events, and build ground truth timelines for sequential ordering tasks.
- Run the model through 6 attempts per cycle, adjusting prompts, constraints, and decoys; rescaffold tasks scoring 0 (too hard) and add complexity to those scoring 4 to 6 (too easy), consistently landing tasks in the target score range of 1 to 3.
- Audit text, audio, and visual outputs against formatting rules and guidelines, and grade reasoning, factual soundness, and alignment with multilayered rubrics.

Mercor - Domain Expert Specialist (Contract, Part-Time) *Jun 2026 - Present*
Remote

- Audit AI generated scripts, verify syntax, and review logic for execution efficiency.
- Run adversarial testing (red teaming) to expose flaws, prevent jailbreaks, identify data leaks, and check compliance with safety frameworks.
- Document for engineers how decoys, code prompts, and structured inputs affect model behavior.

Luckyscent - Inventory & Operations Manager *Oct 2025 - Jun 2026*
Los Angeles, CA

- Managed inventory records, invoices, and discrepancies for all inbound deliveries, including 1,000+ unit wholesale orders: counted and quality checked product, entered it into the OMS, communicated with couriers for drop offs and pickups, and handled outgoing orders.
- Handled stock transfers to four retail locations in Los Angeles and New York, assigned backstock locations in the OMS, and ran weekly inventory counts reconciled to OMS records, coordinating through Slack and Microsoft 365.

Delta Air Lines - Below-Wing Aircraft Agent *Jun 2024 - Sep 2025*
Seattle, WA

- Coordinated time sensitive baggage and aircraft ground operations for international flights under strict departure timelines.

PROJECTS

Savowai Agentic Operations Platform - savowai.com *Mar 2026*

- Designed and deployed four Claude agents (discovery, research, website builds, outreach) across 10 stages with a token budget and output validation per stage and a human approval queue before anything client visible.
- Built a 13 table Airtable base as CRM and agent memory plus an MRR and pipeline dashboard; documented 11 automation systems.
- Security: Google sign in with owner and employee roles enforced in middleware, cron endpoint locked behind a secret bearer token, per IP rate limiting on API routes, and CSP, HSTS, and clickjacking protection headers.
- Stack: Next.js 16, React 19, Claude API, Airtable, NextAuth, Vercel Cron.

Flock ALPR Placement vs. Neighborhood Demographics - flock-demographics-analysis.vercel.app *Sep 2026*

- Tested whether 3,025 Flock cameras sit disproportionately in Hispanic neighborhoods across 2,993 census tracts, controlling for roads, population, income, and 481,281 crime records; found a 30.3% rise per 10 point increase in Hispanic share in King County ($p = 0.035$).
- Stack: Python, GeoPandas, statsmodels, DuckDB-WASM, Transformers.js, Next.js.

Ask the Ref - Football Rules RAG - xrasktheref.vercel.app *Sep 2026*

- Parsed the IFAB Laws into 348 structure aware sections in PostgreSQL with pgvector (heading path, page range, MiniLM embeddings), with transactional reingestion that leaves the corpus unchanged on failure.
- RAG pipeline: hybrid full text and vector retrieval, cross encoder reranking, and fail closed citation validation, tested on a 12 question eval; the Next.js app quotes exact rules with page citations and no API key.
- Stack: Python, PostgreSQL, pgvector, Docker, Ollama, Next.js, TypeScript, Vercel.

Freelance Development - Somuleco AI via Upwork *Jun - Dec 2025*

- Audited an Angular app and wrote a prioritized list of security fixes; added Firebase Authentication and restructured navigation for a SwiftUI iOS app.
- Stack: Angular, SwiftUI, Firebase Authentication, Stripe.

EDUCATION

University of Washington - Bachelor of Science, Data Science *Sep 2023 - Jun 2025*

South Seattle College - Associate of Arts, Business *Sep 2020 - Jun 2022*

SKILLS

AI Evaluation & QA: Prompt engineering, dataset and curriculum creation, LLM output evaluation, rubric-based scoring, QA and review, code evaluation, red-teaming, error analysis, fact-checking, structured feedback
AI & LLM: Claude API, OpenAI API, Glean, AI agents, agentic workflows, MCP, RAG, human-in-the-loop systems
Programming & Tools: Python, TypeScript, JavaScript, SQL, PostgreSQL, Java, Next.js, React, Node.js, REST APIs, Airtable, Vercel, Git/GitHub

CERTIFICATIONS

AI Fluency for Small Businesses - *PayPal & Anthropic* *Aug 2026*

Claude with the Anthropic API - *Anthropic* *Aug 2026*

Teaching the AI Fluency Framework - *Anthropic* *Sep 2026*

Introduction to Model Context Protocol - *Anthropic* *Oct 2026*
