PROFESSIONAL EXPERIENCE

Handshake - AI Trainer

Mar 2026 - Present

Remote

- Contribute to two concurrent AI training programs: Project Helix, evaluating and refining AI model outputs on computer-science tasks through technical prompt writing and structured feedback; and Project Hedgehog, assessing multimodal AI outputs across visual and audio content against quality and accuracy standards.

Savowai AI - Founder & Applied AI Automation Developer

Mar 2026 - Present

Los Angeles, CA | savowai.com | app.savowai.com

- Designed and deployed an approval-gated AI operations platform in which four role-based Claude agents handle lead discovery, business research, website builds, and outreach drafting across a 10-stage workflow.
- Built each agent as an explicit server-side stage with its own token budget and output validation; incomplete generations are rejected, and a deduplicated approval queue is the only path to any client-visible action.
- Integrated the Anthropic Claude API with a secured Vercel cron workflow; verified a production discovery run that identified 9 businesses and queued 7 owner-review tasks.
- Documented 11 Claude automation systems, including scheduled tasks, custom skills, and MCP connectors, each with its failure modes and resulting rules, in a public portfolio repository.

Luckyscent - Inventory & Operations Specialist

Oct 2025 - Jun 2026

Los Angeles, CA

- Managed receiving, purchase-order verification, inventory records, and discrepancy resolution across storefront and e-commerce fulfillment, coordinating fixes with sales, warehouse, and purchasing teams.

Delta Air Lines - Below-Wing Aircraft Agent

Aug 2024 - Sep 2025

Seattle, WA

- Coordinated time-sensitive baggage and aircraft-ground operations for international flights, resolving exceptions with ground teams and flight crews under strict departure timelines.

PROJECTS

Flock ALPR Placement vs. Neighborhood Demographics - flock-demographics-analysis.vercel.app

Sep 2026

- Tested whether 3,025 Flock license-plate-reader cameras sit disproportionately in Hispanic neighborhoods across 2,993 census tracts in Los Angeles and King counties, controlling for road density, population, income, and 481,281 crime records.
- Found a 30.3% rise in cameras per road-mile per 10-point increase in Hispanic share in King County ($p = 0.035$) but no matching pattern in LA, and about 5x the odds of a nearby ALPR at Home Depot and Lowe's versus matched retailers.
- Published a fully static Next.js site with interactive maps, in-browser DuckDB-WASM queries, and local-embedding search over 42 policy documents, with no server or API key.

xR Football (The xR philosophy) - xrphilosophy.vercel.app

Nov 2025 - Present

- Built and deployed a football analytics site for Europe's top five leagues with Next.js, TypeScript, Python, and GitHub Actions, rebuilt hourly from FotMob data.
- Engineered a time-decayed Dixon-Coles Poisson model with xG-blended team ratings, Bayesian shrinkage, and injury adjustments, producing scoreline, Win/Draw/Loss, and expected-points forecasts; documented in a public 210-commit repository.

Ask the Ref - Football Rules RAG (in progress)

Sep 2026 - Present

- Building a citation-first Q&A system over five official rulebooks (IFAB, FIFA, UEFA, Premier League): section-level parsing into Postgres with pgvector, hybrid lexical and vector retrieval, and transactional re-ingestion that leaves the corpus unchanged on failure.

Freelance Development - Somuleco AI via Upwork

Jun - Dec 2025

- Audited an Angular web application through authorized security testing and source analysis, delivering prioritized remediation guidance across JavaScript, TypeScript, HTML, and CSS.
- Integrated Firebase Authentication and restructured authenticated navigation for a SwiftUI iOS app, including token and session-management patterns, using Claude and GitHub Copilot as reviewed tools.

EDUCATION

University of Washington - Bachelor of Science, Data Science

Sep 2023 - Jun 2025

South Seattle College - Associate of Arts, Business

Sep 2020 - Jun 2022

SKILLS

AI & LLM: Claude API, OpenAI API, AI agents, agentic workflows, MCP, RAG, human-in-the-loop systems, prompt design

Programming: Python, TypeScript, JavaScript, SQL, Java, HTML/CSS, SwiftUI

Web & Data: Next.js, React, Node.js, REST APIs, NextAuth, Google OAuth, Airtable, GeoPandas, DuckDB, scikit-learn, Recharts

Tools: Vercel, Git/GitHub, GitHub Actions, Firebase, Tailwind CSS, SWR, ArcGIS, QGIS

CERTIFICATIONS

AI Fluency for Small Businesses - PayPal & Anthropic

Aug 2026

Claude with the Anthropic API - Anthropic

Aug 2026

Teaching the AI Fluency Framework - Anthropic

Sep 2026
